

## GLOBAL ORPHAN FOUNDATION

*caring for the world's most vulnerable children*

### **Medical Mission**

#### **Organization**

Global Orphan Foundation is an Indianapolis based non-profit with a global mission - to advocate on behalf of orphaned and vulnerable children worldwide and respond with action. We have witnessed firsthand the struggle to meet the basic needs of orphaned children in third-world and developing countries and are committed to easing that burden. We believe that all children deserve proper nutrition, access to healthcare, and educational opportunities.

#### **Bolingo Village**

Located in Democratic Republic of Congo, Bolingo Village is the signature project of GOF. By employing widowed women as licensed foster moms and building families with orphaned children, we are leveling the playing field for orphaned children in Congo and affording them the emotional, physical, and spiritual care that they need to thrive. Our sustainable children's care village goes beyond meeting basic needs by providing access to education, a clinic for consistent medical care, a farm for balanced nutrition, clean running water, a loving foster family, and space to run, play and be kids. In short, Bolingo Village is a community that allows for a robust and abundant childhood with a bright future.

#### **Medical Mission**

Physician or Dentist needed to visit Bolingo village and assist with analysis of medical care for village. Dentist to provide general dental care for Bolingo children. If you are able to travel for 7 days and would be interested in this trip please let us know!

\*Base price with economy airfare - \$3,250
